AL - HIKMAH UNIVERSITY, ILORIN - NIGERIA

Adewole Housing Estate, Adeta Road, PMB 1601, Ilorin, Kwara State

FACULTY OF NATURAL AND APPLIED SCIENCES

DEPARTMENT OF COMPUTER SCIENCE

2018/2019 HARMATTAN SEMESTER EXAMINATION

COURSE TITLE: Introduction to Computer

COURSE STATUS: CORE

COURSE CODE: CMP 101

COURSE CREDIT: 3

TIME ALLOWED: 1.5 HOURS

INSTRUCTION: Answer all questions.

1. translates a high-level language into machine language.
2. The Physical components of a computer are referred to as... *Hardware*
3. *Computer* is a general-purpose machine with a remarkable ability to process information.
4. The computer software could be divided into two major groups, namely....., and..... a) System Utilities and System Software *b) System Software and Application Software* c) Application Software and Compilers d) System software and Assembler
5. Computers can run programs written only in a) High level language b) Mnemonic level Description Language c) Machine Language d) Assembly language
6. A piece of silicon containing electronic circuits is called a) Integrated Circuit b) Dedicated circuit c) Portable circuit d) Independent circuit
7. and are the two units that made up the CPU a) Arithmetic Logic Unit & Read Only Memory Unit b) Control Unit & Random Access Memory Unit *c) Arithmetic Logic Unit & Control Unit* d) Control Unit & Buffer Unit
8. is considered to be volatile *a) RAM* b) EPROM c) ROM d) RAD
9. is the set of programs designed to control the operation of a computer a) Productivity software b) Control software c) System software d) Device drivers
10. A computer is considered unusable without *a) Operating system* b) Graphics packages c) Programming languages d) Translators
11. is a computer environment that simplifies users' interaction with the computer a) Command Line Interface b) Graphical User Interface c) Batch Interface d) Hybrid interface
12. Operating Systems perform all the following activities except a) Managing communications between software and hardware b) Providing a degree of hardware Independence c) Controlling access to system resources d) Not performing common hardware functions
13. DOS stands for *Disk Operating system*
14. is a type of Operating System that can perform only one task and be used by only one person at a time. a) Single User / Personal Computer Operating System b) Embedded Operating System c) Multiuser / Network Operating System d) Real-time Operating system
15. EPROM stands for *Erasable programmable read-only memory*
16. Which of the following storage types is used for storing data permanently? a) Elementary storage b) Primary storage *c) Secondary storage* d) Direct storage
17. A complete history of computer would include a multitude of diverse devices such as the Chinese abacus, jacquard loom (1805) and Charles Babbage's a) Amazing engine b) Analytical engine c) Analytical Peddler d) Statistical machine

18. Electronic switches in second generation were based on and a) Discrete diode and vacuum tube b) Discrete diode and transistor technology c) Transistor and valve d) Transistor and SSI
19. Assembly language was introduced in which generation of computer? a) First ☒ b) Second c) Third d) Fourth
20. The generation in which computer produced a lot of heat and also prone to hardware failure was ☒ a) First b) Second c) Third d) Fourth
21. Generation of computers has the following fundamental changes except a) Size b) Cost c) Power d) Climate
22. Memories are built up in kilo modules where k is a) 1080 memory locations b) 1024 memory locations c) 1060 memory locations d) 1040 memory locations
23. All the following are notable versions of the Windows Operating System except a) Windows me ☒ b) Windows you c) Windows XP d) Windows 95
24. is a type of software designed to help analyze, configure, optimize, and maintain the computer a) Utility program b) Device drivers c) Operating systems d) Translators
25. Windows is synonymous with a) Apple b) Digital Research c) IBM d) Microsoft
26. translates assembly language into machine code a) A Compiler b) An Assembler c) An Interpreter d) Tumbler.
27. program executes other programs directly by executing it line-by-line a) An Interpreter b) A Compiler c) Assembler d) None of the above.
28. is an informal program description that does not contain code syntax a) pseudo code b) Algorithm c) Compiler d) Compressor.
29. is a step by step procedure to perform an operation which lead to sought result if followed correctly a) Algorithm b) Compiler c) An Interpreter d) Compressor.
30. A is a collection of instructions that performs a specific task when executed by a computer a) pseudocode b) malware c) algorithm d) computer program.
31. ALU means ☒ a) arithmetic logic unit b) all logic unit c) algorithm logic unit d) none of the above.
32. Which of the following is a translator software? a) Application software b) General purpose software c) Compiler d) Spreadsheet software
33. System software includes the following except a) Operating systems b) Word processors c) Utility programs d) Translator software
34. General purpose application software includes the following except a) Graphics packages b) Word processors c) Operating system d) Spreadsheet applications.
35. Examples of Utility software includes the following except a) File managers b) System Monitors c) AutoCAD d) Virus scanner.
36. Compilers translate high-level language into a) Object code b) Subject code c) Disk code d) Virus code.
- 37-40. Place each of these software products into its correct category (Application or System software):
- Word processor
 - Operating system
 - Defragmenter
 - Adobe Photoshop
41. Integrated circuits (IC) are related to which generations of Computers? a) First b) Second ☒ c) Third d) Fourth
42. Which of the following was a Special Purpose Computer? a) EDVAC b) ENIAC c) ABC ☒ d) All of the above
43. According to speed of operation, computer can be classified into ☒ a) 4 b) 3 c) 7 d) 8

44. Another name for super computer is a) Strong Computer b) Cray X/Y Computer c) MicroMini Computer d) Sal Computer
45. computer makes use of Close System Architecture a) mainframe b) super c) Purpose (d) refined
46. Based on data representation, computer can be classified into..... a) automated, hybrid, and digital computer b) analogue, digital and hybrid computer c) diligent, digital and analogue computer d) dedicated, simulated and super computer.
47. and are two types of data a) Source and File data b) Secondary and File data c) Primary and Post primary data d) Primitive and Secondary data
48. and are the two main types of information a) Secondary and File b) Oral and SMS c) Vocal and Written d) Oral and Written
49. is the interval of frequency for which a transmission take place within a network a) Broadband b) Bandwidth c) Watt d) Modularity
50. The following are mode of data transmission except a) Full-Duplex channel b) Mid-Duplex channel c) Half- Duplex channel d) Simplex channel
51. Transmission equipment include the following except a) Digital Repeater b) Analogue Repeater c) Modem d) Internet
52. MICROPROCESSOR is the major components in which generation of computers? a) 1ST and 5th generations b) 2nd and 5th generations c) 3rd and 5th generations d) 4th and 5th generations
53. 1ST and 3rd generations of computer is between a) 1945-1959 and 1975-1990 b) 1945-1959 and 1966-1975 c) 1945-1959 and 1990-2000 d) 1966-1975
54. 4th and present generations of computer is between..... a) 1945 till date b) 1966 till date c) 1990 till date d) 1975 till date
55. Electronic switches in second generation were based on ___ and ___ a) Discrete diode and vacuum tube b) Discrete diode and transistor technology c) Transistor and valve d) Transistor and SSI
56. Assembly language was introduced in which generation of computer? a) First b) Second c) Third d) Fourth
57. The generation in which computer produced a lot of heat and also prone to hardware failure was ___ a) First b) Second c) Third d) Fourth
58. Generation of computers has the following fundamental changes except ___ a) Size b) Cost c) Power d) Climate
59. A computer is considered unusable without -----
a) Operating system b) Graphics packages c) Programming languages d) Translators
60. is a computer environment that simplifies users' interaction with the computer. a) Command Line Interface b) Graphical User Interface c) Batch Interface d) Hybrid interface
